

Two-factor authentication for a Google account

I do not have a Gmail address yet

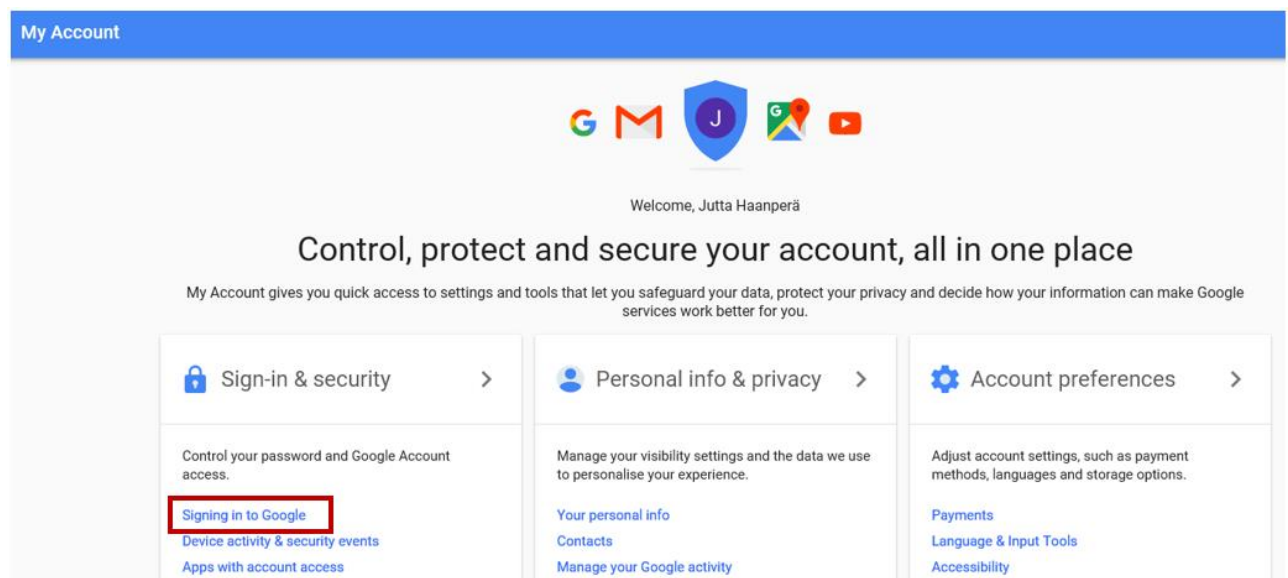

If you have not created a Google account (an @gmail.com address) yet, create one first at www.google.fi and select Gmail in the top right-hand corner of the page. If you are creating a Gmail address, you can set up two-factor authentication by clicking the blue icon in the top right-hand corner of the page and then clicking **My Account** in the new window that opens.

I already have a Gmail address

- Sign in to your inbox with your Gmail address as usual.
- Click the blue icon in the top right-hand corner of the page and click **My Account** in the new window that opens.

- Click **Signing in to Google**

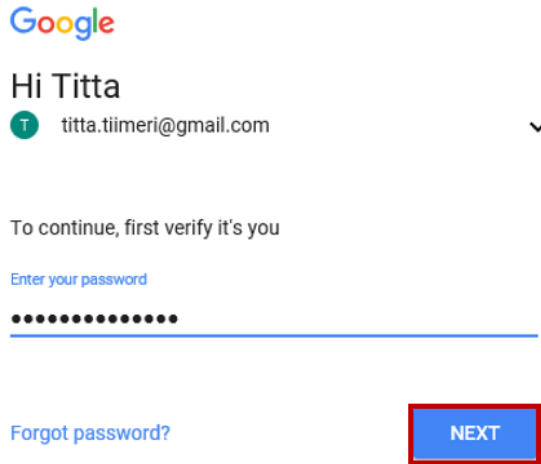

- Select **2-Step Verification**

The screenshot shows the Google Account settings page for 'Sign-in & security'. The left sidebar contains categories like 'My Account', 'Welcome', 'Sign-in & security', 'Personal info & privacy', and 'Account preferences'. The main content area is titled 'Signing in to Google' and includes instructions on password strength and a '2-Step Verification' toggle switch set to 'Off'. A red box highlights the '2-Step Verification' toggle.

- Click **Get started**

The screenshot shows the 'Protect your account with 2-Step Verification' page. It features an illustration of a person at a laptop and a smartphone. The page explains that 2-Step Verification adds an extra layer of security by requiring a unique verification code sent to the phone. It also states that this helps keep bad guys out, even if someone else gets the password. A blue 'GET STARTED' button is highlighted with a red box at the bottom right.

- Enter the password for your @gmail.com address > **Next**

Google
